Wednesday, February 8, 2017
12:00 PM to 1:30 PM
USC - Verna and Peter Dauterive Hall **(VPD) 103**

RSVP to Nicole Guo at
haichaog@usc.edu

Lunch with Meredith Canterbury

Senior GIS Specialist, LSA

Meredith Canterbury is a skilled GIS Analyst with extensive experience generating geographic and demographic datasets for environmental agencies, public utilities, businesses, and government agencies. Recent projects include California High Speed Rail, the State Route 91 Corridor Improvement Project, and the I-710 Corridor Project. Meredith is a highly productive and organized self-starter who excels at technical accuracy and strategic data analysis. She earned her B.A. in Geography from California State University, Fullerton in 2006.

LSA is a diversified environmental, transportation, and community planning firm. Owned by its employees, LSA provides comprehensive services and is committed to providing responsive and expert support to its clients. With nine offices throughout California and over 220 employees, LSA provides services in environmental analysis, transportation/mobility, biological resources, water quality, air quality/global climate change, geographic information systems (GIS), land use/resource management, cultural and paleontological resources, and noise impact assessments.

Join us for a valuable opportunity to meet and learn from an active transportation practitioner!
