CSULB’s Jenny Benitez is named PSR Undergraduate Student of the Year

We are pleased to congratulate Jenny Benitez for being selected as the Pacific Southwest Region (PSR) Undergraduate Student of the Year. Jenny completed her BA in Economics at California University, Long Beach (CSULB). While a student, she worked as a Research Assistant at the Center for International Trade and Transportation (CITT), and after graduating began working at RSG, a real estate agent and manager firm in Irvine, California.

PhD Students Present their Work at PSR Emerging Scholars Research Symposium

On March 4th, the Pacific Southwest Region University Transportation Center (PSR) hosted its annual Emerging Scholars Transportation Research Symposium in partnership with METRANS on campus at USC.

Metro Announces It Will No Longer Widen Freeways, Doubles Down on Freeway “Modernization”

Metro boardmember Otto Luvstewdriev proclaimed, “We’re not approving freeway expansions, if you will, and, as I read this, it’s freeway modernization.” Indeed, Metro appears to be increasing its Freeway Modernization budget, but in a more opaque way, by splitting it out into several new budget categories: Freeway Gap Closures, New Freeways, Partially Complete Streets, and Climate Catastrophe Catalyst Corridors.

Cities Must Follow Through on Road Safety Plans. Here’s How.

There’s a way to overcome the political backlashes and bureaucratic delays that keep cities from implementing safety-focused street changes such as bike lanes.

Webinars & Online Events

**California Bicycle Summit 2022**  
*April 6th to 9th at Oakland, CA, hosted by CALBIKE*  
We invite anyone passionate about bicycling to join us—whether you’re a bike advocate, city official, planner, or a CalBike member who simply cares about making the world a healthier, more just, and more sustainable place.

---

**METRANS EVENT: PSR Research Seminar Series: Mobility, Accessibility and Disadvantaged Neighborhoods**  
*Wednesday, April 6th at 12:00 pm PDT (virtual), hosted by METRANS*  
This project examines commonalities and differences among disadvantaged neighborhoods in mobility and access to opportunities. Our approach is based on the concept of spatial-transportation mismatch (STM), which asserts that spatial distance and poor transportation are potential barriers to opportunities beyond one’s immediate location.

---

**Webinar: Amtrak’s Future in an Era of Expanded Funding for Rail Infrastructure**  
*Wednesday, April 6th at 11:00 am PDT/2:00 pm EDT (virtual), hosted by Transportation Research Forum*  
Join us for a timely virtual presentation by Amtrak’s Dennis J. Newman, Executive Vice President, Planning & Strategy. Mr. Newman will describe how the federal Bipartisan Infrastructure Law passed in November is providing unprecedented funding for intercity passenger rail in the United States. The presentation will discuss both opportunities provided to the passenger railroad and the path to pursue those opportunities. As always, we’ll have plenty of time for Q&A and discussion. Thanks to the many of you who have already registered.

---

**Addressing Performative DEI and Systemic Inequities**  
*Thursday, April 7th from 12:30 pm to 13:30 pm PDT (online-zoom)*  
This presentation introduces OpenCDA, an open co-simulation-based research/engineering framework integrated with prototype cooperative driving automation (CDA, J3216) pipelines that contains perception, localization, planning, control, and V2X communication modules. The purpose of the framework is to take an integrated approach to CDA research that considers closed-loop autonomy to investigate the performance of automated driving components driven by conventional and AI algorithms and their impacts on resultant vehicular and traffic behavior under various environments.  
Zoom Meeting: [https://usc.zoom.us/j/91873923659](https://usc.zoom.us/j/91873923659); Meeting ID: 918 7392 3659; Pass: 975701

---

**Transit Research in Practice: Making change from inside an agency**  
*Friday, April 8th at 1:40 pm PDT (hybrid), hosted by ITS-Davis*  
The research and data analysis team at the MBTA/MassDOT was situated in organizational space between policy decision-makers and the operating divisions. This position allowed us to use research to inform key policy decisions and to help operating divisions improve performance. Several factors were central to our ability to effect change. We built relationships with operating units, the community we
served, and leadership/decision-makers. We understood the data we had, the data we didn’t have, and what type of accuracy was important for different types of decisions. We developed the analytic capacity of the agency and the data literacy of various audiences. The iterative research and implementation process showed the impact of research on the outcomes for the community we served.

**METRANS EVENT:** Balancing of Truck Parking Demand by a Centralized Incentives/Pricing System  
**Tuesday, April 12th at 12:00 pm PDT (hybrid), hosted by METRANS**  
The main objective of this project is to develop a centralized truck parking system that will balance parking utilization in time and space by using full information about supply and demand. Surveys find that most drivers use unauthorized parking locations at least once a week and studies report that many drivers often spend more than 30 minutes looking for parking, or park one hour earlier than required in order to guarantee parking, both of which reduce productivity.

**Reception for Darren Kettle Metrolink’s Newest CEO**  
**Tuesday, April 12th at 5:00 pm PDT, hosted by WTS**  
At DoubleTree by Hilton Hotel (Rooftop Garden)  
120 South Los Angeles Street  
Los Angeles, CA 90012

**Webinar: UC Irvine-ITS Seminar with Professor Paul Ong**  
**Friday, April 15th at 9:00 am PDT, hosted by ITS-Irvine**  
Professor Paul Ong from UCLA will share his thoughts about factors that create transportation disparities and structural racism and transportation.

**Research Submission for low carbon, cost-free, COVID-free Bridging Transportation Researchers conference (August 4 & 5)**  
**Due on April 15th**  
All manuscripts should be written in English and, for the purpose of double-blind review, should exclude any information revealing the names or affiliations of the authors. The submissions process will be managed via EasyChair. BTR does not have proceedings, and submitting your work to BTR does not prevent you from submitting it to journals. You can also submit your recent published work for presentation at BTR.

**Webinar: Electric Vehicles–Past, Present, & Future**  
**Tuesday, April 19th at 12:00 pm PDT, hosted by MTI & SJSU**  
Electric vehicles may seem like cutting-edge technology, but they are in fact quite the opposite: electric versions of the “horseless carriage” first appeared nearly two centuries ago. International EV experts Dr. Gijs Mom and Dr. Daniel Sperling will reflect on lessons from the history of EV technology and policy innovation that can help today’s policymakers and automotive experts smooth the path for cost-effective EV adoption.

**Webinar: NDPTC’s Virtual 3rd Thursday Event - Stories and Lessons from the Tonga Volcano-Tsunami**  
**Thursday, April 21st at 3:00 pm PDT/12:00 pm HST, hosted by NDPTC**  
Please join us for our April 2022 Third Thursday Virtual Event which will spotlight the Hunga Tonga-Hunga Ha’apai Volcano-Tsunami event in January 2022. Presentations will focus on assessment of what occurred, review preparedness, response, and recovery efforts, and examine relevant lessons learned for the disaster management community.
Webinar: Is Sharing Caring? Understanding Shared Mobility Impacts  
Friday, April 29th at 9:00 am PDT, hosted by ITS-Irvine  
Speaker: Professor Susan Shaheen, UC Berkeley.

Webinar: Reforming Governance to Transform Cities  
Thursday, May 5th at 11:00 am PDT/2:00 pm EDT, hosted by Eno Center for Transportation  
Cities own the streets that transit agencies need for their bus lanes. Regions often lack a coordinated entity to oversee implementation of road pricing. Freight rolling off a regional port hub is not always synced with the state and local roadways that connect it.

Data for Active Transportation Research and Planning  
Friday, May 6th at 1:40 pm PDT (hybrid), hosted by ITS-Davis  
Lack of available data can be a barrier to bicycling and pedestrian research and planning. Much of my team’s research focuses on building novel data sources to map bicycling infrastructure, safety, and volume. In this presentation I will outline how we are using OpenStreetMaps to map bicycle infrastructure, crowdsource webmaps (BikeMaps.org and WalkRollMap.org) to map safety and access concerns, and modelling ridership using Strava data. I will discuss how crowdsource data provide unique opportunities to enhance active transportation data, but also challenges particularly around representativeness and equity.

2022 ITS California Annual Conference & Exhibition  
May 16th to 18th at Hyatt Regency San Francisco Airport, hosted by ITS California  
Please check the Membership list to see if your organization is an ITS California Member to use the Membership discount.

Webinar: Cloud storage and data analytics and the impacts on Transportation  
Friday, May 27th at 9:00 am PDT, hosted by ITS-Irvine  
Speaker: Randy Iwasaki, Leader, State and Local Transportation, Amazon Web Service (AWS).

Conference on Sustainability and Emerging Transportation Technology  
May 31st to June 2nd (in-person), hosted by Transportation Research Board  
Transportation technologies (e.g., connected and automated vehicles) and new approaches to mobility (e.g., shared services) are advancing so rapidly that it can be difficult for policy makers to frame incentives, regulations, and market signals to promote all three pillars of sustainability: equity, the environment, and the economy. The Sustainability and Emerging Transportation Technology (SETT) Conference will address questions around how academics, policy-makers, the private sector, NGOs, and others can work together to shape new mobility solutions to benefit all users of our transportation systems.

ITSWC22 Student Essay and Video Competition (Sep 18-22)  
Due on June 1st.  
Turn your knowledge of Intelligent Transportation Systems (ITS) into cash and win national recognition. ITS America Events and Southwest Research Institute® (SwRI®) are proud to partner once again for the 11th annual 2022 ITS Student Essay and Video Competition. This competition serves as an opportunity for today’s transportation, engineering, and public policy students to apply their knowledge in a thought-provoking manner for a chance to win scholarship money, while building awareness of the high-tech transportation industry as a limitless career path.
Webinar: The Accessibility Shift: Transforming Urban Transportation and Land-Use Planning  
Friday, June 24th at 9:00 am PDT, hosted by ITS-Irvine  
Speaker: Jonathan Levine, Professor, University of Michigan.

Webinar: Innovation Roadmaps for Freight Transportation in Europe  
Friday, July 8th at 9:00 am PDT, hosted by ITS-Irvine  
Speaker: Lori Tavasszy, Professor, TU Delft.

Pathways to Opportunity

Planning Intern  
City of Alhambra  
Apply by 04/11/2022  
See more info

APA Scholarship  
American Planning Association Foundation  
Apply by 06/14/2022  
See more info

Assistant Office Engineer  
PGH Wong Engineering, Inc.  
Apply ASAP  
See more info

Assistant Planner  
City of Rancho Cucamonga  
Apply by 04/11/2022
