## Heads Up Riders, A Few Metro C Line Stations Are Closing Saturday For Repairs

Starting Saturday Aug.12 and lasting until late September, certain stations on the Metro C Line will be closed for repairs. Metro is closing the stations in stages for overhead power-line upgrades. The stations are expected to reopen Sept. 25. The repairs come as the C Line reaches its 30th anniversary.

## Robotaxi ride-hailing expansion approved by California regulators despite local objections

Cruise, a subsidiary of General Motors, and Waymo, owned by Google parent company Alphabet, began operating robotaxis in limited areas of San Francisco in 2022. Cruise says it has completed more than 1 million driverless miles, and its vehicles were involved in 54% fewer collisions than human drivers in comparable circumstances.

## Orange County Transportation Authority moving forward study to keep coastal trains operating safely

The Orange County Transportation Authority (OCTA) is moving forward with its two-phased plan to study threats and solutions to keep coastal trains operating safely. OCTA selected HDR Engineering Inc. to lead the South Coast Rail Infrastructure Feasibility Study and Alternative Concepts Analysis, which is Phase 1 of a study, will focus on the seven-mile rail corridor between Dana Point and San Clemente, Calif.

#### Webinars & Online Events

#### **Mending Metro**

#### Thursday, August 17th at 12:00 pm PDT (online), hosted by USC Price

With traffic continuing to snarl Los Angeles County's freeways and an urgent need to reduce auto emissions to curb climate change, the need for public transportation has never been more urgent. But a recent sharp increase in crimes on our local train system has made riders more reluctant than ever to ride the rails. Is there a fix? Join us for an in-depth discussion about how to mend our metro system so that it can realize its promise to provide affordable, efficient and low-emission transportation.

## Webinar: TRID—Your Lifelong Learning Tool for Transportation Research Tuesday, August 22nd at 11:00 am PDT, hosted TRB's Executive Office

TRID helps researchers locate solutions to problems, avoid duplication of work, save resources, and satisfies Federal Highway Administration (FHWA) requirements to consult TRB's TRIS Databases to identify ongoing or previously completed research on a given topic. TRB will host a webinar that will help users understand what is in TRID and how to use its search functions. Learn ways to find the most relevant publications and other products from transportation research projects.

### Webinar: Utilizing Traffic Simulation Models to Analyze Complex Roadway Situations

#### Tuesday, August 29th at 11:00 am PDT, hosted by ITE SIMCAP Committee

This webinar will discuss real world examples of how traffic modeling and simulation have been used to evaluate traffic performance for unique and complex situations. One example will present the modeling of multiple maintenance of traffic phases to determine the impacts to traffic while a construction project is underway. A second example will demonstrate how innovative design treatments are being modeled and implemented in actual projects.

#### **Community Impact of Heavy Duty Vehicle Electrification**

#### Wednesday, August 30th at 10:00 am PDT (online), hosted E2S Climate Hub

Tune in as Dr. Jane Line, civil, materials, and environmental engineering professor from the University of Illinois at Chicago, and Haley Dahl, student at the University of Illinois at Chicago and creator of Green Exploration: Rockford, discuss how the Rockford Region can prepare for the electrification of its heavy vehicles to reduce regional diesel emissions. We will highlight Dr. Lin's involvement in two electrification projects, one funded by the US EPA and the other by IDOT, and focus on the environmental and public health benefits of making this transition.

#### **IAME Conference 2023**

#### Tuesday, September 5th - 8th (in-person), hosted by METRANS

The METRANS Transportation Consortium at the University of Southern California (USC) and California State University Long Beach (CSULB) is honored to be able to host the International Association of Maritime Economists Conference 2023 (IAME Conference 2023) to be held in Long Beach, California, September 5-8, 2023. Since its foundation in 1992, IAME has developed into an international association with over 300 individual members from every continent and more than 10 corporate members. The Association is officially linked to two leading academic journals within the field: Maritime Policy & Management and Maritime Economics & Logistics.

#### Webinar: Green Logistics

#### Friday, October 13th at 2:00 pm PDT, hosted Cranfield School of Management

As logistics contributes considerably to greenhouse gas (GHG) emissions, addressing logistics environmental sustainability is a big concern for practitioners and policymakers. The term "Green Logistics Practices" (GLPs) indicates many logistics-related initiatives to reduce the impact on the natural environment, yet we are experiencing an "understanding into an action conundrum": there is a clear understanding of what should be done, and why, but less clarity in terms of how to go about it. Moreover, companies lack clarity about how to align logistics environmental sustainability with strategic objectives. As this prevents them from coherently turning sustainability into action, we discuss a framework underpinned by five main dimensions: degree of awareness, degree of formalisation, measurement systems, governance and accountability, and budget allocation.
