

# METRANS FALL 2025

## SPEAKER SERIES

### Beyond Traffic: Emerging Topics in Transportation

November 12, 2025 | 12- 1 PM PST

Emerging Topics in Transportation explores how new technologies, data-driven approaches, and evolving trends are reshaping the way we move people and goods. The talk highlights pressing needs in infrastructure and examines the rise of innovative modes such as shared, automated, and micro-mobility, and considers how transportation systems must adapt to meet the demands of a rapidly changing world.

#### About Roxana:

**Dr. Roxana Javid** is a Senior Lecturer of Civil and Environmental Engineering and the Director of the Transportation Program at USC's Viterbi School of Engineering. Javid has been involved in projects and educational programs such as the Eisenhower Transportation Fellowship to help the next generation of transportation professionals. She currently serves as a member of the Transportation Research Board A/E35 Committee. Javid completed her Ph.D. in civil engineering at Texas Tech University, then joined the faculty of Savannah State University where she was Director of the Transportation Infrastructures and Geotechnics Education and Research (TIGER) Group.
