**Join us at I-NUF, the International Urban Freight Conference, to explore all aspects of goods movement in the world's metropolitan areas.**

**October 18-20, 2017  
Hyatt Regency Long Beach**

***Participate in a 2 1/2 day program that offers respected keynote speakers, relevant panels, and over 100 presentations from researchers representing 18 countries.***

**The program will be led by outstanding speakers including:  
Steven Shladover, California PATH, University of California, Berkeley  
Peter Sweatman, CAVita**

**Anne Goodchild, Supply Chain Transportation & Logistics Center, University of Washington**

### **Why should you attend?**

**If you are a freight practitioner:** Hear the research you can use and learn about Best Practices from around the world. Engage with policy makers at the local, state and national levels and learn how the European Union responds to the challenges of growing urban freight volumes. Help ensure that the needs of industry are communicated to researchers and government decision makers.

**If you are a researcher:** Learn about cutting edge work from the world's leading urban freight researchers and join the ever-growing network of scholars and young professionals with an interest in urban freight and city logistics. Connect with industry practitioners and representatives from government who share a similar interest. Experience urban freight from the Southern California perspective through exciting site tours.

**If you represent government:** Identify new research partners in areas such as urban freight economics, modeling, policy, engineering, planning, geography and the environment. Meet fellow agency representatives from various levels of government in the US and Europe. Discuss the impact of policy and regulatory measures with practitioners and the applied research community.

**If you are a member of the community:** Learn more about the movement of freight through our local communities and the kinds of employment opportunities that exist in the freight sector through valuable conference sessions on workforce development. Connect with representatives from industry and government. Hear about the impact of new technology on goods movement and what it means for local communities.
