

Special session

Hyper-local and zero-emission urban deliveries via micro hubs: a solution for the future?

18-10-2019

8th METRANS International Urban Freight Conference, Hotel MAYA, Long Beach

R!sult (Responsive Sustainable Urban Logistics)

Local authorities are trying to maintain the liveability in the city centres. Cities in Flanders are growing and traffic congestion is a continuously growing problem. The increasing number of deliveries can be seen as one of the causes. In the project 'R!sult' VIL is researching an integrated solution for city deliveries.

- Identify best practices in city logistics
- Start a pilot project in one city
- Build a theoretical model and test different scenarios
